

FIFRA Section 24(c) Special Local Need Label

Corteva Agriscience LLC

9330 Zionsville Road

Indianapolis, IN 46268-1054 USA

SPINOSAD

GROUP

5

INSECTICIDE

For Distribution and Use Only in the State of Oregon

Entrust[®] SC

EPA Reg. No. 62719-621

EPA SLN No. OR-220010

For Control of Spotted Wing Drosophila in Cherry (Reduced Preharvest Interval)

This Special Local Need (SLN) label is valid until December 31, 2027 or until otherwise amended, withdrawn, cancelled or suspended.

Active Ingredient:

spinosad (a mixture of spinosyn A and spinosyn D)	22.5%
Other Ingredients	77.5%
Total	100.0%

Contains 2 lb of active ingredient per gallon.

Keep Out of Reach of Children

Environmental Hazards

This product is toxic to aquatic invertebrates. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from treated areas. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Applying this product when rain is not predicted for the next 24 hours will help reduce potential risk to aquatic invertebrates by reducing pesticide runoff from the treatment area into water bodies. This product is highly toxic to bees and other pollinating insects exposed to direct treatment, or to residues in/on blooming crops or weeds. Protect pollinating insects by following label directions intended to minimize drift and to reduce risk to these organisms. Apply this product only as specified on the label.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This SLN label and the federal label for this product must be in the possession of the user at the time of pesticide application. Read this SLN and the label affixed to the container for Entrust SC before applying. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on this SLN label and the container label for Entrust SC.

Application Timing: Treat when pests appear, targeting eggs at hatch or small larvae. Consult your Corteva Agriscience representative, extension service specialist, certified crop advisor or your state agricultural experiment station for any additional local use recommendations for your area.

Application Rate: Apply 4 to 6.4 fl oz of Entrust SC (0.06-0.1 lb spinosad) per acre as a foliar spray to control spotted wing drosophila. Use a higher rate in the rate range for moderate to severe pest infestations. Heavy infestations may require repeat applications, but follow resistance management guidelines.

Resistance Management: Do not make more than three consecutive applications of Group 5 insecticides (spinetoram and spinosad) within a crop season. If additional treatments are required after three consecutive applications of Group 5 insecticides, rotate to another class of effective insecticides for at least one application. Consult your local company representative, extension specialist, certified crop advisor, or state agricultural experiment station for information on alternative effective products to use in your area. Follow all applicable resistance management language on this SLN label and the label affixed to the container for Entrust SC.

Specific Use Restrictions:

- **Preharvest Interval:** Do not apply within 3 days of harvest.
- **Treatment Schedule:** If three applications are made, one may be made up to 30 days before harvest, another up to 10 days before harvest, and the final application at 3 days before harvest. If two applications are made, do not make application less than 7 days apart.
- Do not apply more than 6.4 fl oz of Entrust SC (0.1 lb spinosad) per acre per application.
- Do not apply more than a total of 12.8 fl oz of Entrust SC (0.2 lb spinosad) per acre within 10 days of harvest.
- Do not apply more than a total of 19.2 fl oz of Entrust SC (0.3 lb spinosad) per acre per year.
- Do not make more than three consecutive applications of Group 5 insecticides (spinetoram and spinosad) within a crop season. This restriction supersedes the number of applications on the label affixed to the container of Entrust SC.
- **Chemigation:** Do not apply this product through any type of irrigation system.
