

## FIFRA 24(c) Special Local Need Label (SLN)

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF IDAHO

**For Control of Certain Aphids On Alfalfa Grown For Seed**

**FULFILL®**

**For Agricultural or Commercial Use Only**  
**EPA Reg. No. 66222-274 SLN No. ID-180007**

<b>Active Ingredient:</b>	
Pymetrozine (CAS No. 123312-89-0).....	50.0%
<b>Other Ingredients</b> .....	50.0%
<b>Total:</b>	100.0%

### KEEP OUT OF REACH OF CHILDREN CAUTION

This label is valid until December 31, 2027 or until otherwise amended, withdrawn, cancelled, or suspended.

#### Directions for Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This label must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and pre-cautions on the EPA-registered label.

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR PEST CONTROL, CROP INJURY, OR ILLEGAL RESIDUES.

#### AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

**Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.**

PPE required for early entry to treated areas that is permitted under the Worker Protection

Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:

- Coveralls
- Chemical-resistant gloves made of any waterproof material - Category A (e.g., barrier laminate, butyl rubber > 14 mils, nitrile rubber > 14 mils, neoprene rubber > 14 mils, natural rubber > 14 mils, polyethylene, polyvinylchloride [PVC] > 14 mils, or Viton® > 14 mils)
- Shoes plus socks

Fulfill is a selective insecticide for the control of certain aphid species in alfalfa grown for seed. Fulfill works primarily by ingestion, but also has some contact activity. Affected aphids stop feeding shortly after exposure but may remain on the plant foliage until they die, which is usually within 2-7 days.

Aphid pests controlled by Fulfill include: green peach aphid, pea aphid, cabbage aphid, turnip aphid, and potato aphid.

Apply Fulfill at a rate of 2.75 oz/A when aphids first appear, before populations build to damaging levels. A second application may be made to manage persistent aphid populations.

Thorough spray coverage of plant foliage is essential for optimum control. Apply in sufficient water to ensure good coverage; use a minimum of 5 gals/A when applied by air and a minimum of 10 gals/A when applied by ground. The addition of a penetrating type spray adjuvant, at the manufacturer's suggested rate, is recommended to provide optimum coverage and penetration.

**NOTES: DO NOT** apply more than 2.75 oz/A per application. **DO NOT** exceed a total of 5.5 oz/A per crop per season. Allow a minimum of 7 days between applications. Allow 14 days (PHI) between the last application and harvest.

**Bee Statement:** Fulfill is a highly selective insecticide but is toxic to pollinating bees through oral and contact exposure. When the crop is in bloom, only apply Fulfill in the early morning (prior to 3 hours after sunrise) or late evening (later than 3 hours before sunset) when temperatures are cool and bees are not actively foraging.

Notes: (1) Seed from any treated crop on this label may not be used for human or animal consumption. (2) Alfalfa seed from treated fields may not be used for growing sprouts for humans or animal consumption. (3) Producers of alfalfa grown for seed that use this product or cause the product to be used on fields they operate, are required to inform, in writing, conditioners receiving seed produced on fields treated with this product. A copy of this labeling is required to be provided to the conditioner by the producer. Processed seed must be labeled "Not for human or animal consumption" at the processing plant. The processor must dispose of all seed screenings in such a way that they cannot be distributed or used for food or feed.
