### Measure Your Success

The **Sensor Card** is your early warning system against insect invasions and rapid outbreaks. It is the best way to eliminate guesswork. You can quantitatively evaluate how well your pest management program is working.

### Tips For Effective Insect Monitoring

- For normal use, place one **Sensor Card** per 1,000 square feet.
- During heavy infestations, use two **Sensor Cards** per 1,000 square feet.
- When monitoring fungus gnats, place cards horizontally, sticky side up, on soil.
- Keep unused cards fresh and easy to handle by storing in a refrigerator.
- Change cards routinely – once a week is common.
